

INTERESTED IN CERTIFICATION?

Overview of the Certification Process

This Certification Process training is ideal for anyone interested in learning more about certification with the CCB, and serves as a starting point for those beginning the process. This course is also designed to provide participants with tools and information to simplify the process, as well as answering commonly held questions and addressing myths regarding the certification process. The workshop is designed to provide assistance to people seeking certification with any CCB credentials, and will provide an overview of CCB products and services. It is not intended to serve as an informational session of alcohol and drug addiction professionals with the Department of Public Health in Connecticut. (All licensure issues must be addressed directly to the Department of Public Health at <http://www.ct.gov/dph>). The session includes the opportunity for CCB staff review of all documentation collected towards certification. **This training is at Connecticut Valley Hospital in Middletown and requires registration.**

Coaching Sessions

Coaching sessions are designed to work with individual candidates to provide technical assistance around specific workforce development and certification goals. These sessions are intended for individuals that have completed a certification process course and have specific questions about the certification process and application submission standards. Attendees are expected to bring all applicable application materials for review to the session. This opportunity to meet with a CCB staff member one-on-one is not intended for general credentialing questions or a review of standards.

Overview of the Certification Process

[12/5/2017](#)

9 a.m. – 4:00 p.m.
