

## **CCB and DPH Licensure**

April 5, 2021 – Recently we have received several emails from professionals requesting us to assist with their licensure application to the Department of Public Health. Please note that obtaining a license is a separate process, unrelated to certification. We cannot step in and ask DPH to change their process under any circumstances – it is both unethical and disrespectful to DPH. Additionally, we follow the guidelines that are documented on the DPH website in terms of any credential verification, and we will not alter that without a direct written request from the DPH counselor’s team. Any issues related to licensure are strictly between the candidate and the Department of Public Health.
